

Care Management services are activities intended to improve patient care and reduce the need for medical services by helping patients and their caregivers more effectively manage health conditions.

Elica provides General Care Management and Chronic Care Management Service.

General Care Management is providing assistance to patients for needs impacting their access or management of their overall health care.

Chronic Care Management is designed to specifically help you monitor and manage your Chronic health conditions.

You will develop an ongoing relationship with your Care Coordinator.

Eligibility for Chronic Care Management (CCM) involves having a minimum of two or more chronic conditions, difficulty managing your overall health care, and needing individual and family support to achieve greater health care outcomes.

If you are interested, please request a Care Management Referral from your primary care provider.

Once you are enrolled in Care Management services, you will receive:

- Ongoing support
 - Weekly or monthly contact
 - A Shared Care Plan
 - Self-Management Support
 - Health Education
 - Individual & Family support
 - Community and Social resources
 - Transitional Care
 - Appointment Accompaniment
 - Care Coordination
- 

Our Care Management team consists of RN/LVN's, Behavioral Health providers and individuals trained and experienced to assist you with your overall health care needs.

We have:

- RN/ LVN (Nurse) Care Managers
- Behavioral Health Care Managers
- Care Management Associates

“Elica would like to be your partner in achieving positive health care outcomes.”

We at Elica Health Centers are dedicated to your success.

If you are interested in learning more about our Care Management services or any of our other health care resources, please contact us directly.
